

BRAVIN ORINA

Full-Stack Software Engineer

Laravel • Vue.js • Python • REST APIs • Payment Integration (M-Pesa, Stripe, PayPal) • Cloud & DevOps
Nairobi, Kenya • +254 705 885 972 • orinabravin6@gmail.com

PROFESSIONAL SUMMARY

Full-Stack Software Engineer with experience designing and delivering scalable SaaS applications, business automation platforms, and fintech solutions. Skilled in Laravel, Vue.js, Python, and modern JavaScript frameworks, with expertise in RESTful API development, payment gateway integration (M-Pesa, Stripe, PayPal), database design, and cloud-based deployment. Re-architected the Tumabill invoicing platform from a monolithic service bundle into 10 modular service plans, then took it to market: solicited and won clients, onboarded them successfully, and delivered the platform's first live client invoices. Maintains production data integrity by purging bot signups and hardening registration flows, and automates management reporting.

EXPERIENCE

Swifthub Limited — Nairobi, Kenya

Lead Software Developer August 2025 – Present

- Re-architected Tumabill from a monolithic service bundle into 10 modular service plans (CRM & Sales, Invoicing & Credit, POS & Orders, Inventory & Stock, Purchasing, Communications, Service Catalog, Reports & Analytics, Administration), adding module-based organization access provisioning, per-client service selection and validation, and upsell paths.
- Led the platform's go-to-market: solicited prospects, won and signed clients, and ran successful onboarding.
- Issued the platform's first live client invoice on 31 March 2026, marking the transition from development to production billing.
- Automated PDF invoicing with DomPDF (500+ invoices/month) and integrated M-Pesa Daraja, Stripe, and PayPal gateways, cutting manual reconciliation effort by about 70%.
- Mapped and purged 526 bot/spam signup accounts from production databases via scripted detection and deletion routines, then introduced protective measures to prevent recurrence: rate limiting on signup and auth endpoints, reCAPTCHA validation, email/OTP verification, IP-based throttling, honeypot fields, and input validation.
- Generated sales, debtors, aging, payments, and customer statement reports (PDF and Excel) to validate data health and support management decisions.
- Established CI/CD pipelines (GitLab CI), code-review workflows, and automated testing, increasing deployment frequency from weekly to daily.
- Coordinate development tasks, provide technical guidance, and mentor 2 junior engineers.

AicoMg.org

Machine Learning Engineer February 2025 – May 2025

- Led development of a production-ready AI platform integrating multiple domain-specific machine learning models into a modular, containerized architecture using Docker, FastAPI, and Django.
- Designed a secure authentication layer and interactive command-line client for real-time interaction with AI services via REST APIs, and managed end-to-end deployment with Docker Compose and Nginx.

Senses Hub

ASR Product Engineer 2025

- Developed core backend and modeling components for a multilingual speech recognition solution submitted to the Inclusive Speech Technology Hackathon.
- Fine-tuned transformer-based models (Whisper, wav2vec 2.0) on Kenyan English, Kiswahili, and indigenous language datasets.

Informed Systems Ltd

Product Design Manager October 2023 – February 2024

- Managed website design, content strategy, and SEO marketing initiatives; oversaw branding, design direction, and technical support for digital products.
- Installed, configured, and commissioned CCTV surveillance, fire alarm, and intrusion detection systems.

KEY PROJECTS

Tumabill Invoice Generator | Laravel, Vue 3, Vuetify, MySQL, Redis, DomPDF, M-Pesa API

- Full-stack, multi-tenant invoicing platform with automated PDF generation, multi-currency support, and real-time payment tracking, used by 200+ registered businesses.
- Transitioned the subscription model from a monolithic bundle to modular service plans with per-tenant provisioning.
- Onboarded the platform's first client and issued its inaugural invoice on 31 March 2026.
- Strengthened platform security by purging 526 bot signups and adding rate limiting, CAPTCHA, email/OTP verification, and IP throttling; automated operational reporting.

Nyuki AI Platform | Python, FastAPI, Django, Docker, Docker Compose, Nginx, REST APIs

- Developed a production-ready AI platform integrating multiple domain-specific machine learning models into a modular, containerized architecture with secure REST APIs and an interactive CLI for real-time interaction.

Swift HR SaaS Core | Laravel 8, MySQL, Multiple Payment Gateways, Pusher, Spatie Permissions

- Enterprise HR platform with multi-payment gateway support (Stripe, PayPal, M-Pesa, Paystack, Flutterwave, PayTM, Mollie), real-time chat, role-based permissions, and automated installer.

Samkab (Forex Bureau Management) | Laravel, Vue 3, Vuetify, MySQL, ApexCharts, jsPDF, Laravel Excel

- Full-stack forex bureau management system handling multi-currency exchange corridors (KES, UGX), buy/sell rate management, teller reconciliation, and spread-profit calculation.

M-Reside (Property Management) | Vue 3, Vuex, Chart.js, jsPDF, Firebase, M-Pesa STK Push

- Property management platform with tenant and lease management, invoicing, payment tracking, water bills, and SMS communication for landlords and managers.

SKILLS

Languages: Python, PHP, JavaScript, TypeScript, SQL, HTML/CSS, Bash

Frameworks & Libraries: Laravel, Vue 3, React, Django, FastAPI, Vuetify, Tailwind CSS, Bootstrap

Databases & Caching: MySQL, PostgreSQL, MongoDB, Redis

Cloud & DevOps: Docker, GitLab CI/CD, GitHub Actions, Firebase, Vercel, Nginx

Payments & APIs: M-Pesa Daraja API, Stripe, PayPal, Paystack, REST API Design, Swagger/OpenAPI

Security & Data Integrity: Rate Limiting, reCAPTCHA, Email/OTP Verification, IP Throttling, Database Cleanup, Reporting

Tools: Git, GitLab, GitHub, Composer, npm, Vite, DomPDF, Laravel Excel

EDUCATION

Bachelor of Science in Computer Science — Egerton University, Kenya

CERTIFICATIONS

Software Engineer Certificate — Holberton School
